RAHUL KUMAR

New Delhi, India | rahulsiwan2001@gmail.com | +91 9135578125 | linkedin.com/in/rahul2001kumar

PROFESSIONAL SUMMARY

Backend Developer with 3+ years of experience designing scalable backend systems using Python, FastAPI, Django, DRF, MongoDB, and AWS. Experienced in Big Data processing, multithreading, and government-scale applications. Skilled in integrating Generative AI solutions using LangChain and LLM-based applications.

TECHNICAL SKILLS

- **Programming & Databases:** Python, SQL, MongoDB, MySQL
- **Backend Frameworks:** FastAPI, Django, Django Rest Framework (DRF), Flask, Basic Angular
- **Generative AI:** LangChain, LLM Integration (OpenAI / Hugging Face – API based), Semantic Search & Vector-based Retrieval
- **Data Engineering:** Data Warehousing, Data Cleaning & Preparation, Multithreading & Multiprocessing, Batch Processing
- **Cloud & DevOps:** AWS (S3, EC2, Route53)
- **Tools & Concepts:** Redis, API Security & IT Compliance, Government Project Standards

WORK EXPERIENCE

Python Developer | Pioneer E Solutions – Govt. of India (UPSC Portal / NIC) | *Nov 2024 – Present*

- Designed and developed scalable backend APIs for a Government of India (UPSC) portal using FastAPI and MongoDB.
- Optimized large-scale data processing pipelines, reducing report generation time using Python multiprocessing and multithreading.
- Implemented multiple report-generation workflows to support Big Data analytics and operational requirements.
- Integrated AWS S3 for secure document upload, storage, and retrieval.
- Built and maintained high-performance MongoDB schemas, indexes, and aggregation pipelines for large datasets.
- Ensured strict adherence to IT compliance, security standards, and government data policies.
- Worked on API-driven workflows and automation, aligning backend logic with real-world examination and candidate management processes.

Backend Developer | Hostbooks Limited | *Jul 2022 – Oct 2024*

- Developed a custom data preparation and cleaning platform like Tableau Prep Builder, focused on performance and scalability.
- Implemented data integration pipelines supporting MongoDB, MySQL, relational databases, and file formats (CSV, Excel, JSON).
- Designed and built Data Warehouse modules to handle large-scale datasets.
- Developed custom report generation engines based on dynamic, user-defined parameters.
- Built backend integrations (plugins) for third-party platforms including Shopify, Hotelogix, Consolidation XML/XLSX, and Canara Spring.

EDUCATION

Bachelor of Computer Applications (BCA) – Maulana Mazharul Haque Arabic and Persian University, Patna | *Jun 2018 – Aug 2021*

INTERNSHIPS

Full Stack Development Intern | Ducat India | *Jan 2022 – Jul 2022*

- Gained hands-on experience with Python, Django, DRF, HTML, and CSS.
- Built REST APIs and optimized backend logic for better performance.

UX-ProdX Intern | UX-ProdX | *Jan 2022 – Mar 2022*

- Designed scalable, maintainable, and well-documented UI components based on Figma designs.
- Worked with HTML and CSS (Bootstrap) to enhance user experience across key pages (navigation, account creation, sign-in, registration).
