

RAHUL KUMAR

Location : New Delhi, India | Email : rahulsiwan2001@gmail.com | Mobile : +91 9135578125 | LinkedIn : <https://linkedin.com/in/rahul2001kumar>

PROFESSIONAL SUMMARY

Backend Developer with 5 years of experience building backend applications, REST APIs, data-processing systems, and Generative AI solutions using Python. Hands-on experience with FastAPI, Django, Django REST Framework (DRF), MongoDB, SQL, and AWS. Developed LLM-based applications using RAG, semantic search, NLP, embeddings, and vector search with Milvus and OpenSearch. Experience working on government and law-enforcement platforms, data-processing pipelines, API security, and cloud-based backend systems.

TECHNICAL SKILLS

Languages & Databases: Python, SQL, MongoDB, MySQL, PostgreSQL, TimescaleDB, Redis, OpenSearch

Backend Frameworks: FastAPI, Django, Django REST Framework, Flask

Web & Frontend: Angular, React, HTML, CSS, Bootstrap

Generative AI & NLP: LangChain, LangGraph, LLM Integration (OpenAI, Anthropic Claude, Google Gemini, Hugging Face), Retrieval-Augmented Generation (RAG), Semantic Search, Embeddings, Entity Extraction, Prompt Engineering

Vector & Search Systems: Milvus, OpenSearch, Vector Databases, Vector Search

Data Engineering: ETL Pipelines, Data Cleaning, Data Preparation, Data Warehousing, Big Data Processing, Multithreading, Multiprocessing

Cloud & DevOps: AWS S3, AWS EC2, AWS Route 53, IAM, Docker, Git, GitLab

Software Engineering & Domain: Microservices, Unit Testing, SDLC, REST APIs, API Security, Data Security, IT Compliances.

Domain: Government Project Standards, CCTNS, I4C, Law-Enforcement Systems, Accounting

AI Tools: ChatGPT, Claude Code, Google Gemini

WORK EXPERIENCE

Software Developer (AI & LLM Systems) – (May 2026 – Aug 2026)

Staqui Technologies | Contractual | Gurugram, India

Roles & Responsibilities:

- Developed and maintained a Django and Django REST Framework (DRF)-based Police Assistance Platform for ingestion and processing of CCTNS FIR documents used by law-enforcement agencies.
- Built LLM-powered CrimeGPT features that allow investigators to query crime and FIR data through natural-language, RAG-based conversational interfaces.
- Designed NLP pipelines for structured entity extraction including persons, locations, offences, and legal sections from large volumes of unstructured FIR text using LLM-based processing.
- Worked on semantic search and vector retrieval for FIR and criminal records using Milvus and OpenSearch to help investigators find relevant records faster.
- Worked on features related to I4C requirements for cybercrime coordination and criminal-tracking use cases.
- Developed Suspect and Victim dashboards that bring linked records, case history, and analytics together in a single investigation view.

Python Developer – (Nov 2024 – Apr 2026)

Pioneer E Solutions | Govt. of India – UPSC Portal / NIC

Roles & Responsibilities:

- Developed backend REST APIs for a Government of India UPSC portal using FastAPI and MongoDB.
- Used Python multiprocessing and multithreading to process large datasets in parallel and improve processing performance.
- Built report-generation workflows for Big Data analytics and operational requirements
- Integrated AWS S3 for document upload, storage, and retrieval.
- Worked with MongoDB schemas, indexes, and aggregation pipelines for application data and reporting workflows.
- Followed API security, data-security, and IT-compliance practices while working with government application data.
- Developed and supported Angular components integrated with FastAPI REST APIs and backend services.

Backend Developer – (Jan 2022 – Oct 2024)

Hostbooks Limited | Full time | Gurugram, India

Roles & Responsibilities:

- Developed backend services in Python for data preparation, transformation, and integration workflows.
- Developed a custom data-preparation and data-cleaning platform comparable to Tableau Prep Builder, with focus on performance and scalability.
- Implemented data-integration pipelines supporting MongoDB, MySQL, relational databases, CSV, Excel, and JSON data

sources.

- Developed and supported Angular application components integrating frontend interfaces with backend REST APIs and services.
- Built Data Warehouse modules for organizing and processing large datasets.
- Developed report-generation features based on dynamic, user-defined parameters.
- Developed backend integrations and plugins for Shopify, Hotelogix, Consolidation XML/XLSX, and Canara Spring.
- Developed and supported React-based UI components integrating frontend applications with backend APIs

EDUCATION

Bachelor of Computer Applications (BCA) – (Jun 2018 – Aug 2021)

Maulana Mazharul Haque Arabic and Persian University, Patna

Intermediate (Class XII), Bihar School Examination Board (BSEB) — 2018

Matriculation (Class X), Bihar School Examination Board (BSEB) — 2016

INTERNSHIPS

Full Stack Development Intern | Ducat India | May 2021 – Oct 2021

- Worked with Python, Django, Django REST Framework, React, Angular, HTML, CSS, and Bootstrap.
- Built REST APIs and worked on backend logic and performance improvements.

UX-ProdX Intern | UX-ProdX | Aug 2021 – Nov 2021

- Converted Figma designs into reusable and maintainable UI components.
- Worked with HTML, CSS, and Bootstrap on navigation, account creation, sign-in, and registration pages.
